which is the reason why i dont record
Yeah, i was able to record this 27.0 kd game in jelly right now with 28 players and it was starting to lag.

First game of renegade I played today, after some early game basic infantry fighting (where my 1 deaht comes from) i immediately went to sak and started killing stuff. I'm experiencing warpiness, the server's SFPS drops/lag issue and at one point (where I miss 5 shots) stuttering because I'm frapsing. As you can see from the video I my mouse is laggy as result of frapsing too.

The fucking warping and lag is annoying and the reason I missed half the shots I missed. This lag for the most part isn't an issue on MPF's server.
