"where's the fraps? all i'm seeing is screenshots that any cheater could produce lol"

i was playing on jelly marathon with 4.0

"you're not clearing your name; it just looks like you want attention"

What? I'm producing screenshots and fraps of me playing on Jelly Marathon, which uses 4.0 server's anti-cheat.

"there there Iran - all eyes are on you now just like you always wanted :satisfied:"

whoa what lol, i just want to be unbanned and for MPF to act like a responsible community, at least on the official renegade community forums.

"the Walls game looks like you drove an arty and got lots of repairs against a team incapable of stopping it (same happens any time HTMN, Got2bRoni, or jez get arties because they come equipped with 5 to 10 magic repair people)"

errrm they use arty on Walls Flying? Really? No wonder they suck. I was playing with Sakura with a little bit of Apache the whole time, getting lots of points shooting snipers and Orcas. I got sick of the dumbass sbhs on my team not planting any nukes while I had a sniper on the mesa so I bought a sbh and chinook and killed wf in about 90 secs.

"((that and the other team doesn't look so good, with stanislav near the top stats-wise lmao))"

so it's like the average game on Jelly and MPF, it's good to have that re-affirmed.
