mods have been banning people left and right for stupid reasons. it glitched their server so everyone is banned for those reasons that one person got banned for. if this were a professional server run by a company they wouldnt be banning people over such stupid crap as

"stealing" a teammates vehicle

using the same name as a mod "impersonating" nobody cares except you narcissistic retards.

and the latest thing "ponies" i wouldnt be surprised if that ban was directed at me too. banning me for what reason you may ask? oh cause they feel like it and it's their server.

for real i say this with the bottom of my heart. you idiots need to die. only reason anyone should be getting banned is if... NEVER. you stupid losers. bunch of nerds giving themselves mod powe then using it on day one every chance they get. renegade is a crappy ass community i saw this crap in another thread about other rene servers. soem of these people are early 20's and should not be trusted running a server or a forum.

i was banned from their forum chat for saying "well well well" and he banned me right before he went to dinner for 5 minutes for his own amusement. Jesus bunch of loser kids/trolls. im done with it. someone who isnt a immature troll pls run a rene server thanks
