Reneforums is going to have to deal with a name infringement issue soon lol

Okay if you are going to hijack the communities server machine after selling the community to volcom you obviously don't care about the community you only care about your own damn self. That being said you do not deserve the name or have any claim to it. I also want to say fuck you because you have caused a great deal of stress and down time for my clan TP(thepeopleclan) fucking up the vps that I rent from rencorner.(I know it was indirect but still...)

The VPS you had wasn't hosted on a "community" server machine. It wasn't really hijacked, more like a power struggle which got management from the datacenter involved.

I never shutdown the entire server having you experience a downtime, and I never wiped the whole server. Focus your anger to the people responsible for that.
