building bars are an advantage; you don't have to press K and interrupt your gameplay to look at that screen

that's an advantage, as is the on-screen mine counter that comes along with many of them

Spongebob c4 is an advantage because it's easier to see

clearscope is an advantage because you don't have to deal with green scope shit

colored tank shots / smoke are an advantage because it's easier to see and dodge stuff

there's lots of things that are advantages that many servers have disallowed in the past

radar hacks and other things are also advantages, just more so than building bars and colored skins and whatnot

do you understand?
