That would be true if evolution was the only factor. But, it isn't. I'm a Christian, so in turn, I beleive in creationism, which is the idea that God created the univers. Since I beleived that God created the univers, there may be another earth like ours. But we just can't be sure right now. I don't know when we will find out. Mabey in 5000 years? Mabye when we all die? Who can say? The earth isn't really that old anyway according to cration. It's only like a couple thousand years old really. So mabey there is another world like ours out there.

So, the answer isn't no anymore. It's, mabey.
