I mean I'm an e-janitor and developer for a server which regularly has 300+ players on and you see me spamming every forum about it.

Get a life, nerds.

The Marathon server is a persistent game (well, for a map anyway) with 50 players in the game, you're an "e-janitor" of a matchmaking server for C&C RTS', which is NOT persistent, and the games are completely compartmentalized from each other.

try again iran
