Ha. No FPS matches Renegade's netcode. As long as British Telecom keep delaying the broadband revolution "because there isnt the demand" [bullsh\*\*], us 56k gamers will still remain loyal to Renegade.

Ever played Ghost Recon on a 56k? Few shots fired, but holy shit it's unplayable.

btw fellow 56kers. Dont play online unless you set your modem up properly

This guide is as good as any.
