Don't know what is wrong but it shows up in RenList like in the attached screenshot.

Might be fixed with a newer BRenBot release though, it only seems to affect a few servers listed on GSA now.

The screenshot shows the RenList v1.0.5 application window. At the top, there is a menu bar with File, Options, and Help. Below the menu is a toolbar with buttons for WOL and GSA. The main window contains two tables. The top table lists servers with columns for IP:Port, Game name, Map, Players, P..., and Ping. The bottom table shows configuration options with columns for Option, Data, Player, Side, Score, Kills, D..., Ping, and Time. At the bottom of the window, there are 'Connect' and 'Refresh' buttons, and a status message 'GSA: Total servers: 51 - Available: 48'.
