Send_Object_Update does work; however, it works better than it did in 3.4.4, and you actually start to see the weapon switch animations, whereas in 3.4.4 there was no indication that the server was switching your weapons besides the weapon icons on the hud lighting up and being unable to fire.

Beings it now tries to animate switching the weapons (thus making it look like your a spazz) I decided to go with it just switching you to the pistol when you move if your holding a sniper rifle (beings I can't get a clean weapon disable and 0 ammo confused people too much).
