The only reason I posted that picture was because the guys on BHP wanted to see it, and I thought you guys might like to be included.

Aside from this we also have the Power Plant, Advanced Power Plant, Airstrip, SAM Site, and Weapons Factory in the final stages, and they will be released in our actual update which will include textured models...

And, honestly, if you're getting on this thread just to tell me to end this project, don't bother.
