With Renegade you're left with 10 people at most. Without Renegade, you're just another bit of fungible gamers lost in an endless sea of the Internet and will eventually dissipate into other communities that are much larger than you can ever hope to be.

More like with Renegade, you're left with 10 people, without Renegade you're left trying to compete with the likes of ECW and BHP (Red Alert FPS lolololol etc.)

Your post made the trip here worth it btw. Drama is delicious.
