I'm not sure what happened, but the last couple weeks I can no longer tell whose who in Renegade. None of the player names appear on the characters.

I have no clue how this happened, as I don't use skins or anything else...simply join a game and start playing when I have time.

Any ideas what is causing this? Tried reinstall Tiberian Technologies again, but it didn't help the situation. It's like i'm missing a font or something?
