Ethenal wrote on Fri, 18 July 2014 13:19Oh, you're actually using an older version that still has it compiled in I think... the new ones don't. At least, I think - I don't know what configuration DP compiles BR with. I just know that if you follow the instructions in the SVN to set up the compilation environment, you don't get Net::FTP without downloading it from CPAN.

That's why newer plugins that require Net::FTP include it in their zip file / svn directory
