This plugin is for players to view available SSGM commands.
use !commands or !cmd

Add the command list into the ssgm.ini under [Commands]. You just add a number after the word Command for every command you want to list.

for example:
[Plugins]
00=BanSystem.dll
01=Mute.dll
02=Command.dll

[Commands]

Command1=!ping
Command2=!donate
Command3=!teamdonate
Command4=!swap
Command5=!cswap
