Xpert wrote on Sun, 28 September 2014 16:02Never had this problem. Unless you're only running 2 maps then maybe because I've seen it bug sometimes with just 2 maps on rotation.

Na.

I wrote a simple ssgm rotation command to show what I mean.

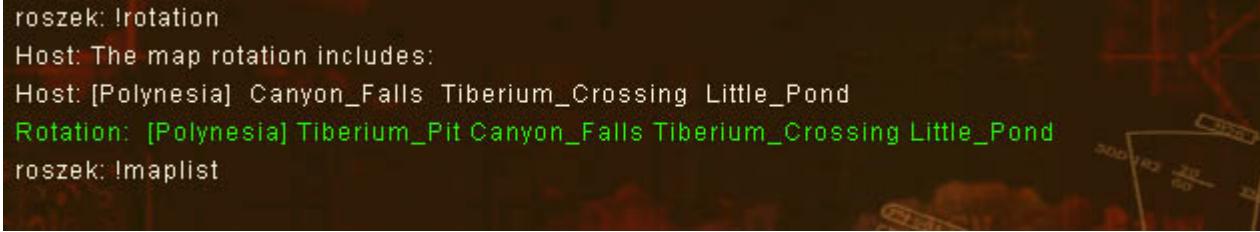

With the brenbot command you see a map missing from the list, there are 5 maps as you can see from my plugin.

The brackets mess up when it gets to a map not listed.

roszek: !rotation
Host: The map rotation includes:
Host: [Polynesia] Canyon_Falls Tiberium_Crossing Little_Pond
Rotation: [Polynesia] Tiberium_Pit Canyon_Falls Tiberium_Crossing Little_Pond
roszek: !maplist

The image is a screenshot of a game interface, likely Command & Conquer: Renegade. It shows a list of maps in a rotation sequence. The list includes [Polynesia] Canyon_Falls, Tiberium_Crossing, Little_Pond, and [Polynesia] Tiberium_Pit. The word 'Rotation' is highlighted in green. Below the list, there is a map preview showing a desert landscape with various terrain features and structures. The overall interface has a dark, pixelated aesthetic typical of early 2000s real-time strategy games.
