Quote:The C&C Commando tech demo is really tiny, and not a playable build. It contains experiments of a model viewer with a couple of 3D models, a simple terrain viewer, and a weird demo with a commando character walking around on the Road Atlanta race track, taken from the Sports Car GT game the same team was developing.

It's legit too, the same leak has a early version of Sonic Extreme and he gave some of the files to some guy whose working on a Sonic Extreme remake in Unreal Engine 3, that guy showed the early build running in a Saturn emulator.
