Edit:

Your going to want the .lvl files for the modifications and resave them.

Read your post thinking you where trying to use them in leveledit and not the server.

Ya this isn't level edit related lol. It's server related. They're .Idd files that aren't being recognized on any map other than the default and mission maps.

So what do you mean resave them? Do I just load up the lvl files and then just save it again? I don't get what that would do.
