roszek wrote on Fri, 16 January 2015 14:18 I'm looking for the lvl files does anyone know where I might get them?

Looks like it was never released. You'll probably have to fire up levelredit and decompile it, generate lighting, pathfinding, and vis. Also spend some time adding some manual vis points. I did this for a few maps that were broken in 4.1 recently (Pacific, Land, etc.)
