Some players were an overall waste of repairs

Like the WarHawkVJ guy with his old man Mumble crew - they lost so many games because the buildings died while they super repped his arty or med instead

Spoony was always worth repairing, but people would flock to jez636363 like he was Jesus or something

It's hard to be bad in an arty with that much support, honestly

I remember a com match against terrible gamerz0ne where the entire Nod team repaired buildings and luna's arty on Under and survived the map (losing by 40k or more, but still)

10 guys repairing one arty - fucking awful lol
