wtf i never hid

also the mod action wasnt spot on at all, it was terrible moderation and im glad there arent mods anymore

its always being protocol to ask people to change and not force them too (theres a reason theres a !tc command that the public can use)

if anything the mod changes teams if deemed unfair but that didnt happen because destroyer is busy trying to cyberfuck mintshake

dj might be a fucking retard but he wasnt wrong, if anything you're acting like dj right now wyld

l.o.l
