He got caught in .cc using it and disappeared for a while

He showed up in Jelly Marathon one day still using it, and rather than record it I pointed out how obvious it was that his med shots were traveling across the map instantly

He then accused me of cheating when I hit his Hotwire from a distance running away with my light tank, bought another Hotwire and repaired random tanks for 5 minutes, and left the game

How often do you see clanwars guys repairing anything? It was an odd exchange
