Subject: Re: Getting Meadow.mix to work with TT
Posted by shaitan on Mon, 22 Feb 2016 02:34:02 GMT

Did you get the .mix to actually convert/install? When I do it with that file you fixed, it only has these files show up in the ttfs(converts/installs fine):
3B604331.dirt02bt.tga
4AB799C7.fels_grun01.tga
6D202A4E.gdi_con_tmp.tga
76E07D0B.meadow_v4.w3d
79B4D438.gdi_base_tmp.tga
B2E8DD08.shp_eng5.tga
EF6E9B93.felswand_grun01.tga
F3F682FF.0201cavetx.tga

You cannot download to get into the server, and that last time I tried it, it crashed the fds(no crash dump made).
