Hi,

I was able to install Ren and play using Mint Linux and Wine. When I tried to install the 4.2 installer I get the following error on my machine.

Any ideas what this is? I followed the instructions above but nothing I seem to do stop this. (I tried installed vcredist_86.exe (vcrun6, vcrun2010) separately but I've no idea what version this is using)

I tried using Ubuntu (16.04) and Mint (17) on the same machine but got the exact same error. I've tried about 20 times in total but nothing seems to work.

Any help would be great.

Thanks

Tilly
