Sk8rRIMukGeneral HavocI run Renegade on a VooDoo 3 2000 on another PC. Although it will only run in 16 bit mode i can normally get a good 40 fps on directx 8. I don't know how well it performs online but it is possible to run ren on a voodoo card.

My Albatron Geforce 4 ti 4200 P Turbo is 0wnage!

_General Havoc

Well it seems it all works fine for the but any body know about voodoo5500 solution as he asked for?

Just seems like a dodgy card take my advice and get yourself a GeForce 4 that card 0wnZ.

-Sk8rRIMuk

isnt the card Nvidia? anyway, yeah, the Geforce 4 0wnz all, im getting the 128 MB card shipped in as we speak.
