I've finalized 2 maps I've been working on for a few years now(took a 3 year hiatus), and they are now complete. I can't upload them here due to file size restrictions, but I provided links below.

C&C Backstab is a small to medium sized AOW map where your base is back 2 back against your opponents. Look for the custom spawn vehicles, and a few hidden access points! Enjoy!

C&C Halloween 2014 is a very small death match map with a lot of goodies and custom bots. It also features a custom sound track for a spooky experience!
