Yeah the options I am picking between are:

1. Stop all development on the 4.x branch (not really something I want to do but it may happen)
2. Figure out how to properly build the 4.x version and get a build server going for it
- or 3. Migrate the 4.x branch to Visual Studio 2017 and build things the same way as we do on the 5.x branch which means dropping XP support

So far one person has voted "yes" on the "I use XP" poll and it wouldn't surprise me if there are people out there playing Renegade on XP who don't follow forums etc and don't even know that XP support might be going away.
