---

Are the source files (.max/.gmax) to any infantry models (not the 2 in the Renegade SDK which clearly aren't the same actual source files used to produce infantry for the game and not things created by 3rd parties but actual original files used in the game either final or beta) available anywhere or were any such files released by Westwood (or leaked or whatever) at any point?

Also does anyone know if there is any information out there on how infantry models with LOD are made (not just the generic LOD tutorials but something that shows how Westwood did LOD for the infantry specifically)

EDIT:

I checked <https://github.com/Ericson2314/Renegade-Beta-Assets> and there are no such files (there are re-creations of old beta infantry and things but no actual complete infantry source files that came from Westwood)
