DarkDeminall of you that have said that if a hack was ever released for Renegade it would ruin it... well i give you for example Counter-Strike the game has hundreds of hacks for it yet as long as the fans deal with it given with the help of Cheating Death and Valve anti cheat system which are equivlents to Renguard.

Thank you for reading my rant...

It's hard to ruin a game that's already CRAP. Counter-Strike has a crappy hack-infested community, crappy gameplay, and crappy graphics. If you'd take away everyone from the Counter Strike community that used any cheats, the damn game/mod would be dead.
