Try <http://www.cutephp.com> for a news index, i use it for my site

<http://Snipefrag.blueinferno.co.uk/index.php> its easily customisable and you can add users etc with certain admin levels. You log in threw a seperate place

<http://snipefrag.blueinferno.co.uk/news/index.php> .

You can set templates of find ones people have made on the web.. or make one yourself.
