General Havoc3.5 TB connection is some capacity. Thats a maximum transfer rate of around 437.5 Megabytes a second. It would be on a dark optical fibre connection to get that sort of speed.

No, notice the capital 'B'... I said 3.5 Terabytes, as in 3.5 trillion bytes a second.

Even if I was talking about Terabits, it would be 437.5 Gigabytes a second, not Megabytes (3,500,000,000,000 / 8 = 437,500,000,000).
