They ALL count. ALL timed, prox , remote ALL count towards 30 limit!

Only the Remote and Proxy C4s count towards the limit as was stated above. There is no limit on Timed C4s since they only remain on the map for 30 seconds at most.

The mine limit was instituted to cut lag and to keep the teams from placing so many mines that entering a base would be impossible. Remotes are tied into the limit for a similar reason.
