Well, thanks for clarifying my theory that you used people until you were through needing their assistance, then you talk shit about them and move on to another group.

Reminds me of The Matrix and that virus speech.

I wonder if the Black Cell people will see the light with you, Scrumfy.

Oh, and SS - I wouldn't be talking about respecting anyone's servers. After all, you gave out the hub IP of n00bstories IRC to the DoS attackers. Real respect you have, jackass.
