Subject: Searching of /Data
Posted by IRON FART on Fri, 24 Oct 2003 03:32:41 GMT

Renguard will search Renegade/Data directory and ban cheaters if cheats are found there right?
Senario:
What if I was to replace the bighead files with the originals in always.dat? Then Renguard will miss the file, think I sm clean, but still allow me to cheat.

And i'm guessing that a full search of always.dat will be sluggish because its so huge.

You lot get the idea...........
ideas?..........
