---

tiberium pit 2 was played on the pits last night and still the stealth suit didnt work???

Im almost positive that msgtpain had the custom scripts installed on the server and im pretty sure all the clients had them installed

Now is it becuz it's laddered?

Ive tested with another player and i on my FDS and it worked but i dont think i had laddered on.....

Why isnt the stealth suit working on other servers besides my FDS??
