---

I cannot join some dedicated servers and all non-dedicated servers. I have enabled all of the ports that I'm supposed to. I have windows xp home, zone alarm, 1.5Mbps DSL connection. I have a friend that has the same problem and when either of us try to host a game of Renegade the other can't join the game. I'm totally confused, I've seen the error message "Operation Timed Out" until I'm sick of it. Can anyone help?
