You've been clamoring for updates. I promised one by the end of the weekend and here it is:

Our ASM programmer is still absent, so we've given up on waiting. Now Scorpio9a is somehow finding bits and pieces out of his busy schedule to make the move from consultant to coder for the team.

A lot of progress has been made over the past couple of weeks. The most important part of RenGuard is getting the server and client to talk to each other in their established protocol. This part is what they're working on now and making great progress.

No ETA yet, but like I always say... when I know, you'll know.

Welcome Scorpio9a to the team!
