I downloaded the drivers from the website and installed them. It did not change the fps. I can play the game with higher resoltuion without a drop in fps, but I cannot increase my fps beyond 20 in a 24 player server.

Whereas it is very nice to have much better graphics, the lack of higher fps still limits me in the game. For example, snipeing is totaly out of the question when I am at 6 fps.

Unless there are other things I am totally missing, I will just have to stick with it until I get a new computer.
