Make it size 10 or something.

Anyway, heightfield is pretty easy.

I'll explain.

1. On the presets menu, find the bar "heightfield", click it.
2. Click on "new terrain" or whatever.
3. Make it about 200-250 x 200-250
4. Get the thing out of camera view and into heightfield mode. (The button with the mountain.)
5. You can now edit the terrain.

For a more specific tutorial, private message me.
