Ghost isn't out yet, and it's for X-BOX and PS2 I believe. Also, it isn't an FPS game, its a third person stealth game along the lines of MGS or Splinter Cell. Ghost and Renegade are in no way in competition with one another.

That being said, a SC mod for Renegade is technically copyright infringement unless you get expressed permission. But Ren is a game that costs \$5 in the bargain bin now, I doubt they're going to feel threatened. That's assuming you ever get a competent team together and have the mod finished...
