I hope this mod actually takes off, some guy at modding.renstation.net started one but didnt finish it. Maybe he would lend u something if he hasnt already, i forget who posted it though. maybe slash0x...

Most mods start and never finish. It is like people suddenly wake up and say "I am going to make a total conversion today!" And dont realise the trouble of setting up a mod team, setting up a team takes alot of effort.. and since all good modders and modelers, so on are taken, you should search outside of renegade for modders, search for hl2 modders, get their models, and bone them.

I wont say much more as i dont wanna put anyone who is working on this modd off.
