Stealth Black Hand soldiers are overused. It pisses me off when I'm on GDI and every single building in the game has been killed by a SBH with a nuke. It is cheap and annoying. Take City Flying. When does Nod NOT use Stealth Tanks (and Stealth soldiers when the base defences have gone down)? Why not change?

It's like some people modified their Renegades to only be able to buy SBH in the characters section and Stealth Tanks in the vehicles section.
