If you don't have beta 2, just email SomRhino, I can't remember his email though. Just check at drireign.net

As for the release...I think it's going through internal testing now, or is close to it. After that it goes out to the beta testers. After the beta testers, either the bugs get fixed and it goes public...or, the bugs get fixed and it goes back so more stuff can be completed.

EDIT: SomRhino isn't very pickky about who gets te betas anyway, so as long as you're not a complete n00b there is good chance that you could get to be a beta tester. just register at [drireign](http://drireign.net).
