This isn't your standard map release... Dante discovered a way to dramatically decrease load times on Westwood-created maps. Blazer edited our .mix files and we tested them out. Even on our fast systems we noticed a huge improvement in load times for these maps. Now they are available for you.

For browser:

<ftp://ftp.n00bstories.com/Renegade%20Maps/Fixed%20Westwood%20Maps.rar>

Or if you want to use your FTP software:

Connect to [ftp.n00bstories.com](ftp://ftp.n00bstories.com).

Browse to the Renegade Maps folder, then download Fixed Westwood Maps.rar

If you're asked for a username and password, username = Anonymous and password can be whatever you want.

My FTP server allows 10 simultaneous connections. This is so you can't lag my Renegade server on the same box.

Please contact me if you want to mirror this file. And Beanyhead, upload the rest of the maps you have, dammit.
