I think the only reason that a good working aimbot + other hacks is not widely available for Renegade is the simple fact that the game is not that popular. Especially compared with something like Counter Strike. Which really we should count ourselves very, very lucky indeed or else we would have to put up with much more than aimbots me thinks.

Well to those coders out there who are interested in how games work and subsequently make hacks, cheats etc. I will not tell you not to make these but rather I would kindly ask that you please do not release them to anyone.

Wee
