Infinint

And how would you know the stuff I make sucks?

And here is the flaw in your topic, I havent released anything before so if i release something most people will just think its some n00bish map becuse they have never seen anything else by me, much like C&C Ultimate Plateo.

First of all, Ultimate plateo? I can't tell if your trying to spell plateau, or Plato...

Second, there is no flaw in his logic. The only reason you would have never released stuff in the first place is if you thought it sucked, or htought the community would think that way. However, your logic flaw is that you think people will CONTINUE to think that way, so you use it as an excuse to never release anything. But thats all it is, an excuse.
