i have to say WELL DONE!!!

this is great news

this will change all sniper servers for the better and also maybe some AOW servers

better news than reading about reborn pfft

EDIT

tested it on jtek very nice work they worked great

would it be possible in the future to make servers fully editable..

ie

weapon damage/ammo

which characters are available

same with tanks

how much money the harvester will bring in

the speed's of units

how many people each tank can hold

changes like this can help make servers better..
