sniper12345- Ren Alert took less time and is less bugged than Reborn.

lol!

Neither of them are any good.

Make no mistake, I appreciate the time and effort it took to produce the mods, and have much respect for the creators.

Its just my personal opinion that is coming through here.

After the initial Renalert release (which was shit) I havnt bothered looking at it again. The leaked Reborn kicked its arse. The completed Reborn is not as good as it should be. Both teams have fallen down somewhere, but as I said at the start good effort - should go nicely in someones portfolio.....
