Yea, I often find myself favouring the pistol over the laser rifle. It kind of depends on the situation and your opponent. Usually it's best to use the laser on everything, but if your trying to be covert, it's good to be quiet. The lasers good on vehicles though, and it's worth buying a SBH just to combat vehicles.

The only thing risky with pistol-silent kills is that some people may have pistol sound modifications that give em a loud sound like a colt.
