Oh Fuck!, I just reinstalled renegade 4 days ago and now i have nothing to do over the holiday break i have. also i think the closing of wol is due to cheaters. Well this is the sign that renegade is on life support. Looks like this game might actualy die. I never signed up for a gamespy account so im uninstalling once again and i bet over 100 people are doing the same thing im doing. Well it was nice while it lasted. Stupid EA..
